

Project Experience

Supply and Distribution of Point of Care Testing Devices

Dates

Dec 04 – May 07

The Project

Flinders University experts were part of the Point of Care Testing Device Group, who were responsible for device management, training and competency assessment for Point of Care Testing operators, and the delivery of an internal quality control program for the Point of Care Testing in General Practice Trial. The devices enable on-the-spot testing of patients, aiming to reduce significantly the time required for diagnosis of a range of medical conditions.

Client

- Department of Health and Ageing

Associated Firms

- Bayer Diagnostics
- Point of Care Diagnostics
- Roche Diagnostics Australia Pty Ltd

Research Team

Prof. Paul Worley
Mark Shephard
